Asia’s infrastructure trends and the Singapore Journey
Despite clear infrastructure deficits, APAC still under-invests

Infrastructure investment as % of GDP (latest data available)

Source: Economist Intelligence Unit
• Government is a key driver of all infrastructure spend – public and private
Asia – Infrastructure spend

- Government across the region recognize the need for continued infrastructure spend.
  - US$9 trillion per annum by 2025
  - US$78 trillion between now and 2025

Overall, the Asia-Pacific infrastructure market will grow by 7% to 8% a year over the next decade, approaching US$5.3 trillion by 2025.

- Government requires private sector finance and expertise to deliver on the infrastructure promise.
- Private sector capital and capability critical to sustained delivery.
The Asian Infrastructure Gap: Forecast (2009)

Infrastructure Deficit of US$8 trillion (2010-2020)

Investment Barrier

- Poor project preparation
- Legal & Regulatory Framework
- Poorly Defined and Unstructured Procurement Processes
- Haphazard Pipeline Management
- Risk Allocation and Commercial Structure – imbalanced risks vs reward
- Lack of Capacity
- Political risks – stability and cycles
- Lack of investment subsidy in certain jurisdictions

Supply of Capital

- Government
- Multi-laterals
- Commercial lending
- Private sector (15-30%, Indonesia-65%)
  - Infrastructure funds
  - Pension funds
  - Strategic investors
    - Constructors
    - Operators
- Others
The Singapore Journey - PPPs

- First PPP handbook issued by the Ministry of Finance (Singapore) in Oct 2004
- Provided guidance to all implementing government agencies
  - Introduction to PPP – setting out the rationale
  - Structuring a PPP deal
  - PPP Procurement Process
  - Managing a PPP – critical success factors
- Promoted the use of PPP for all projects above S$50m
The Singapore Journey – PPPs (Continued)

Ministry of Finance published the Public Private Partnership Handbook

Singapore Customs
First IT PPP project awarded for 10 year period for the development of software, maintenance and operation of the system

Changi NEWater Plant
25 year contract awarded for the design, build, own and operate of Changi NEWater Plant

2nd Tuas Desal Plant
Awarded for the design, build, own and operate of 2nd Tuas Desalination Plant for a 25 year period

Ongoing PPP tenders
6th Incineration Plant
Changi NEWater Plant 2

Ulu Pandan NEWater Plant
Awarded a 20 year contract for the design build, own and operate of Ulu Pandan NEWater Plant

Incineration Plant
First PPP project awarded by National Environment Agency for the design build, own and operate of a new incineration plant for 25 years

ITE College West
First social infrastructure PPP in Singapore for the design, build, finance and operate of a school facility for 27 years

Singapore Sports Hub
Landmark PPP deal for the design, build, finance and operate of the Sports Hub for 25 years

Singapore Sports Hub

Project Brief

The project cost of the Singapore Sports Hub was c.$1.8 billion, making it the largest sports PPP project in the world. The project included the construction of a national sports stadium with capacity of 55,000, swimming complex with capacity of 6,000, aqua centre, a 41,000 square meter business development park, taking over the Singapore Indoor Stadium constructed in 1989, and other supporting facilities.

PPP Project Company is responsible for the design, construction, financing, operations and maintenance of the Singapore Sports Hub, concession length 25 years. PPP Project Company will create a multi-purpose sports, recreation and lifestyle location to attract internationally renowned sports events and performances from all over the world.

PwC acted as the lead financial advisor to the government, and led other legal, technical and operational consultants in the advisory consortium.

**Singapore Sports Hub – Vision**

Fully integrated sports entertainment and lifestyle hub as a landmark

### Objectives

1. Integrated Lifestyle Hub for World-Class Sports & Entertainment Events
2. Commercially Viable Business Model
3. National & Global Landmark

### Desired Outcomes

1. Thriving sports & entertainment ecosystem
2. Key driver for ‘Sporting Singapore’ vision
3. Platform for business partnerships
4. Preferred sports & entertainment destination
5. Urban regenerator of Kallang area
6. Vibrant lifestyle hub with world-class customer service
Case Study – Sports and Culture Category
Singapore Sports Hub – Reason for using PPP

Leverage on value of private sector for Government projects & objectives

• Government agency outsourcing of ‘non-core’
• Private sector can design, build, finance and operate facilities
• Allows Government agency to focus on ‘core’ activities

PPP Co to provide integrated plan and whole life costing:

• Integrated Design & Construction – end use driven
• Optimised finance solution – equity and debt
• Facilities Management
• Facilities Operator – attract, promote and manage events
• Venue Management, Lifecycle and maintenance
• Innovation

- Payment/cash flow
Case Study – Water Category
Singapore Water PPP Case Study

- Singapore has successfully introduced the private sector in its water industry
- Common BOT structure for water and wastewater treatment- NEWater, Desal, raw water
- Private player is paid through a payment mechanism which has fixed and variable components. Private player does not take on volume risk on water consumption level
- Public Utilities Board (PUB) is the regulator as well as the off taker

The relatively simple and robust structures for these PPPs mean that PUB is able to attract wide interests from the private sector to participate
**Case Study – Water Category**

**Singapore Changi New Water**

- After 3 months of competitive tender, the consortium Sembcorp Newater Pte Ltd was selected as Preferred Bidder out of 5 bidders in 2008
- Contract term: 27 years
- Responsibility of consortium: Design, construct, operate and maintain Newater Plant, and financing for initial design and capex costs during construction
- Project Cost: SGD 120 million

Seng-Chee Lee is a Partner of PricewaterhouseCoopers (Singapore) and he provides financial advisory services to support complex transactions in particular in the Capital & Infrastructure projects.

He has more than 17 years of experience in financial structuring, finance raising and M&A activities in both buy and sell side, government and private sector advisory roles, including expertise in Public Private Partnerships (“PPP”), Private Finance Initiatives (“PFI”) frameworks.

He has advised in the development of a number of milestone infrastructure projects and transactions in Singapore, Asia and Europe covering sectors including power, water/waste water treatment, transport infrastructure (toll roads, bridges, ports, mass rapid transport, airport etc). Seng-Chee has worked with many government agencies, major projects finance institutions, infrastructure funds, strategic investors (eg developers) and multilaterals/bilaterals donor agencies on infrastructure development, investments and divestments.

In Singapore, he has supported many government agencies (including Public Utilities Board, Singapore Sports Council, Ministry of Education, Ministry of Trade & Industry, Singapore Cooperation Enterprise, IE Singapore) in many projects involving the promotion of Public Private Partnership to attract private sector expertise and investments into Singapore’s public infrastructure. Seng Chee has also advised private sector consortiums in selected PPP projects tenders in Singapore including wastewater, desalination, transportation, and education campus.

Seng Chee graduated from the London School of Economics (UK) and is a Fellow of the Institute of Chartered Accountants in England and Wales.
